How many doors exist in the building?	There are 3 doors.	There are 3 doors in the building.	Based on the latest data, there are <b>**3**</b> doors within the building structure.	There are 3 doors in the building.	The building has 3 doors.
What is the volume of the roof space?	The gross volume of the roof space is 76.47 cubic meters	The volume of the roof space is 76.46551559765.	Based on the current data available in our system, the specific volume for the roof space has not been recorded or calculated.	The volume of the roof space is 202 cubic meters.	The volume of the roof space is 129987.0625 cubic units.
How many storey exist in the building?	There are 2 storey in the building	The building has 2 storeys.	Upon reviewing the building's specifications, it is confirmed that the structure consists of <b>**two stories**</b> .	The building has 2 storeys.	There are 2 storeys in the building.
What is the gross floor area of the entrance hall?	The gross floor area of the entrance hall is 8.69 square meters.	The gross floor area of the entrance hall is 8.693506249999999.	Based on the provided data, the gross floor area for the entrance hall is <b>**8.69 square meters**</b> .	The query returned all entries from the `IfcElementQuantity` table, but none of them explicitly mention the gross floor area for the entrance hall.	The gross floor area of the entrance hall is not explicitly listed in the results. However, based on the data, the most likely value is 15.41678125 square units.
What is the illuminance unit defined in the file?	The illuminance unit defined in the file is Lux.	The illuminance unit defined in the file is LUX.	Based on the data, the illuminance unit defined in the file is <b>**Lux (lx)**</b> .	The illuminance unit defined in the file is LUX.	The illuminance unit defined in the file is 'LUX'.
Is there a Laundry in the building?	No there isn't any Laundry space in the building.	There is no Laundry in the building.	Based on the available building data, there is no dedicated laundry facility within the structure.	There is no Laundry in the building based on the available data.	Yes, there is a laundry sink in the building.
What is the perimeter of the entrance hall?	The entrance hall has a perimeter of 12,810.	The perimeter of the entrance hall is 12,810.0.	The perimeter of the entrance hall, as indicated by the provided data,	The perimeter of the entrance hall cannot be determined from the provided database schema.	The perimeter of the entrance hall is 30 units.

question	Expected	Article	Gemeni	Qwen-8B	Mistral-medium
			is <b>12,810 units</b> .		
What is the building address?	The address is 'Westminster, London, UK'.	Enter address here, Westminster, London, UK.	Based on the current project data, the building is located in <b>Westminster, London, UK</b> .	The building address is located in Westminster, London, UK. The specific street address is listed as "Enter address here" in the postal address details.	The building address is 123 Main St, Springfield, Illinois, 62704, USA.
What is the unconnected height of the roof space?	The roof has an unconnected height of 1000 mm (1 meter).	The unconnected height of the roof space is IfcLengthMeasure(0.) and IfcLengthMeasure(1000.).	The unconnected height within the roof space, often referred to as the clear vertical clearance or headroom, is <b>1000 mm</b> .	The unconnected height of the roof space is 2500.0 units.	The unconnected height of the roof space is 0.3 units.
What is the name of the project?	The project name is 'Project Name'.	I don't know the answer.	Based on the current data retrieved, the project is identified as <b>'Project Name'</b> .	The project name is "Project Name" as retrieved from the LongName column of the IfcProject table. The Name column contains "Project Number", but LongName provides the full project name.	The project name is "Project Name" and its number is "Project Number".
